

ARBEITSZEUGNIS

Ms. Aswani Pottekkatt-Ashokan, born on August 8, 1990, in Kerala (India), was employed by our company as a biometric programmer from November 1, 2020, to April 30, 2026.

The Astrum CRO Germany GmbH, formerly Pharmalog Institut für klinische Forschung GmbH, is an independent institute for pharmaceutical research. We have been operating as a contract research organization (CRO) for over four decades and conduct various clinical trials (Phases I through IV) as a comprehensive service, including study planning, statistical analysis, and final reporting. All services are performed in accordance with both international and national regulatory requirements (e.g., ICH-GCP, FDA regulations, EU directives, AMG) as well as the relevant Standard Operating Procedures (Astrum and sponsor SOPs).

Her main responsibilities included the development, creation, and quality assurance of biometric programs within the context of clinical trials. Ms. Pottekkatt-Ashokan worked based on statistical analysis plans (SAPs), study protocols, and other relevant guidelines, and was responsible for the generation and analysis of clinical trial data, including the creation of data sets (SDTM, ADaM) as well as tables, figures, and listings (TFLs) for study reports.

In addition, she ensured compliance with all relevant legal, regulatory, and internal quality requirements and provided support during audits and in the implementation of corrective and preventive actions (CAPA). Quality assurance for programming artifacts and study-related documentation was also part of her responsibilities.

As part of the risk management process, she proactively identified potential risks related to data quality, project timelines, and budget, and developed appropriate measures to manage them. She kept a close eye on project budgets and deadlines and used appropriate tools to monitor performance.

Ms. Pottekkatt-Ashokan also contributed to the further development and optimization of biometric processes, with the aim of continuously improving efficiency and quality. She ensured that all project-related documents were always ready for review and actively participated in data review meetings.

Ms. Pottekkatt-Ashokan consistently performed her duties with care, efficiency, and independence. She consistently met both her self-imposed and agreed-upon goals. As part of the workflow, Ms. Pottekkatt-Ashokan always provided accurate and timely information.

She carried out the tasks assigned to her independently and meticulously. Ms. Pottekkatt-Ashokan consistently demonstrated initiative and impressed everyone with her strong commitment to her work. Ms. Pottekkatt-Ashokan was very reliable, and we were always able to work with her in a spirit of trust.

Thanks to her strong professional expertise and her consistently friendly and helpful demeanor, Ms. Pottekkatt-Ashokan was always highly regarded by both supervisors and colleagues. Her conduct toward supervisors and colleagues was always exemplary. She always presented herself to our clients with confidence and poise.

Due to restructuring within the corporate group and the resulting staff reductions, we have had to terminate the employment relationship for operational reasons effective April 30, 2026. We deeply regret this and would like to thank Ms. Pottekkatt-Ashokan for her consistently excellent work. We wish her continued success in the future and all the best personally.
