## Professional Summary

Senior Statistical Programmer with 7+ years of experience in CRO environments, specializing in **ADaM/SDTM dataset development, TFL programming, pooled analyses (ISS/ISE), and regulatory submissions**. Strong SAS programming, QC, and cross-functional collaboration skills with a proven record of delivering **submission-ready, audit-ready** outputs across all phases of clinical trials.

## Key Skills

**Programming & Standards:** SAS, SDTM, ADaM, CDASH, TFL Programming & QC, SDTM CRF Annotation, UAT, ISS/ISE Dataset Preparation, Define.xml & Reviewer's Guide, Pinnacle 21 Validation

**Regulatory Standards:** FDA, EMA, ICH-E3/E6/E9, CDISC

**Statistical Tools:** SAS, R, SPSS, Python

**Therapeutic Areas:** Extensive experience in clinical studies across multiple therapeutic areas, including Oncology, Rheumatology, Virology, Nephrology, Neuromuscular Disorders, Dermatology, Cardiovascular Disorders, Ophthalmology, Gastroenterology, Infectious Diseases (including COVID-19 studies), and more.

## Professional Experience

### Astrum CRO Germany GmbH - formerly PHARMALOG

Ismaning, Germany | 2020 – Present

#### Senior Biometric Programmer

#### Key Responsibilities & Achievements

- Delivered SDTM and ADaM datasets for global Phase I–III trials, ensuring FDA/EMA submission readiness.
- Performed SDTM mapping and ADaM derivations; QC programming using SAS.
- Developed and maintained SAS macro suites for reporting and automation.
- Managed eSubmissions to FDA/EMA, Pinnacle 21 validation, and post-submission requests.
- Produced submission-ready datasets and TFLs aligned with CDISC standards.
- Led ISS/ISE pooled analyses and integrated reporting.
- Conducted UAT for EDC edit checks and programming workflows.
- Supported define.xml, metadata, and reviewer's guide preparation.
- Applied statistical methods: Kaplan–Meier, Cox regression, logistic regression, ANOVA, MMRM.
- Generated TFLs for CSRs supporting medical writing deliverables.
- Collaborated cross-functionally with biostatistics, data management, and medical writing teams.

## Estimondo GmbH

Hessen | Home based | 2019 – 2020

Contract based **Statistical Consultant**

### Programming & Data Standards

- Implemented and validated CDISC SDTM and ADaM datasets.
- Created define.xml and Reviewer's Guides for regulatory submissions.
- Ensured compliance with global data standards (FDA, EMA, CDISC).
- Applied Machine Learning (ML) and Natural Language Processing (NLP) techniques in Python to automate SDTM dataset extraction.

## Quanticate

Bangalore | full time | 2016-2017 Clinical Data Management

**Clinical Data Coordinator**

### Responsibilities include

- Electronic Data Capture (EDC) – Medidata Rave, Oracle InForm, Veeva Vault.
- Data cleaning, tracking, validation, and reconciliation processes.

## Kerala Veterinary and animal Sciences University

Kerala | full time | 2013-2015

**Technical Assistant**

- Statistical Analysis, SAS, SPSS, R Programming.

## Education

- Master of Science in Biostatistics
  - Kerala Veterinary and Animal Sciences University, Kerala, India | Graduated 2011-13
- Bachelor of Science in Statistics
  - Autonomous college, Kerala, India | Graduated 2008-2011

## Certifications

- [SAS Programming 2: Data Manipulation Techniques](#) | issued by SAS.
- [SAS Programming 1: Essentials](#) | issued by SAS.
- Bioconductor for Genomic Data Science Specialization | Python based | issued by John Hopkins University.
